Notes ..................................................................................................................... 14

• Please read all instructions completely before starting any part of the installation. Always make sure to visit www.azek.com to ensure you are viewing the most current installation instructions, care and cleaning, technical information and more.

• AZEK Rail should be installed using the same good building principles used to install wood or composite railing and in accordance with the local building codes and the installation guidelines included below. AZEK Building Products Inc. accepts no liability or responsibility for the improper installation of this product.

• AZEK Rail may not be suitable for every application and it is the sole responsibility of the installer to be sure that AZEK Rail is fit for the intended use. Since all installations are unique, it is also the installer's responsibility to determine specific requirements in regards to each Rail application.

• AZEK Building Products Inc. recommends that all applications be reviewed by a licensed architect, engineer or local building official before installation. If you have any questions or need further assistance, please call AZEK Customer Service at 877-ASK-AZEK (877-275-2935) or visit our website at www.azek.com.

• AZEK Railing is tested as a whole system and should be used that way. It is not intended to be used in conjunction with other railing systems or fasteners.

• The following Installation Guidelines are applicable for installation of AZEK Premier, AZEK Trademark, and AZEK Reserve Rail Systems (except AZEK Reserve over post applications).

• IMPORTANT: Make sure the DRIVE TOOL/DRILL is configured or set to use the SCREW setting when driving and/or tightening all FASTENERS.

• SAFETY: Always wear goggles when handling, cutting, drilling and fastening materials.

• Failure to install this product in accordance with applicable building codes and AZEK's written Rail Install Guide may lead to personal injury, affect rail system performance and void the product warranty.
Installing AZEK Rail with Glass Infill

AZEK Rail with Glass Infill is available in 6’ lengths. Visit www.azek.com/installation to view AZEK installation videos. Consult your local building codes for guard and handrail requirements.

Measuring Your Railing Area
- Measurements are from center to center of post. Rails are produced in 6’ lengths to allow for finished end cuts and angles.
- Determine how many 6’ AZEK Custom Rail Packs you need and check to be sure you have all the components (and quantities) listed in the chart shown to the right.

Important Information
- AZEK Rail 6’ Rails are designed not to exceed 6’ center of post to center of post.
- Cut slowly, using a fine tooth saw blade to avoid chipping.
- For 42” railing use 54” Post Sleeves.
