ORDER GUIDE

SIMPLIFIED RAIL BUYING

We're Keepin' It Rail

Let's be honest, TimberTech decking and railing just go together, like peanut butter and jelly — or strawberries and champagne. This past year, we've taken our streamlined railing selection and simplified it even more.

We firmly believe that railing shouldn't be complicated — so we've untangled the selection process for homeowners and the ordering process for you, our trusted partners. Our three simple railing categories allow homeowners to quickly coordinate their rail style with their new decking. And, the simplified SKUs and bundling options make ordering the correct railing a breeze.

This guide walks you through the diverse range of TimberTech railing profiles and gives you the low down on ordering. So, whether your client is searching for something classic or yearning for a contemporary railing, this guide simplifies the process so you're able to recommend and order the correct components for the perfect deck and railing combos.

Now, get out there and keep it rail with your clients.

PRODUCT CHOICES

NEW

Classic Composite Series

The Classic Composite Series, a simple system with endless design options, combines four railing profiles into one. It uses a Universal Rail and offers four top rail options: Premier Rail®, RadianceRail®, Trademark Rail™, and Drink Rail that uses a deck board as the top rail. This allows for easy, intuitive ordering with fewer SKUs. Designed for the homeowner who wants an impactful railing design that complements the deck as well as the homes’ exterior.

Drink Rail Guidelines

- Compatible with all full profile, square-shoulder, standard width (5.5”) deck boards from the TimberTech AZEK, PRO & EDGE lines. NOT compatible with scalloped boards (i.e. Terrain Collection, Prime Collection & Prime+ Collection)
 - Narrow width (3.5”) boards should be used for between-the-post applications only.
 - Wide width (7.25”) boards should be used for over-the-post applications only.
- Compatible with all Classic Composite Series Railing Infills except for glass.
- For Over-the-Post Applications it is important that the deck board used be wide enough to completely cover the top of the post sleeve. For Between-the-Post Applications, any post sleeve sizes work.

Builder Rail

Bring both style and function to your outdoor living space when you choose this mod railing profile. This railing uses a deck board as the top rail, so it's easier than ever to match your decking and railing for a coordinated look. Plus, the over the post installation means your view isn't interrupted with protruding post caps.
