# Design Your Own Oasis

**MAKING INDOOR LUXURIES AN OUTDOOR REALITY.**

Whether it's a veranda with cozy seating or a gorgeous deck with an open-air kitchen, your outdoor space is an extension of your home. To create a cohesive indoor-outdoor area that flows seamlessly, it is important to use materials and colors that complement or match your interior spaces, but provide you with the form and function needed for the outdoors.

TimberTech's low maintenance composite and PVC decking is engineered to mimic the look of exotic hardwoods, with an unmatched selection of colors and design options. The Vintage Collection offers a variety of board widths to choose from and features a diverse color palette, mirroring exotic hardwoods to align beautifully with your interior flooring. Bring your style effortlessly from indoors to outdoors, and enjoy your oasis for decades without the hassle.

## THE BEAUTY OF REAL WOOD

Honoring the design of your home, TimberTech's rich and refined selection of colors and textures, brings the quality of interior flooring to your elevated outdoor space.

## NO SHOES, NO PROBLEM

Unlike real wood, TimberTech won't crack or split, so you can confidently walk barefoot without the fear of splinters. And their innovative PVC formulation, combined with the light color palette, stays cooler in the sun compared to competitive composite decking.

## BEAUTY WITHOUT UPKEEP

TimberTech's boards are made with up to 85% recycled materials and never need to be stained, painted, or sealed, making them an ideal low-maintenance solution.
